FW3-29 10pts. Portfolio Project: My Bug starts pg. FW3-31 30pts. 	uploaded by: Nov 01, 2009
Lecture Night 10/28—6 to 9		

All textbook Project files must be completed on time for grading, these are firm dates. **Absolutely NO PNG files are to be uploaded to the Web**, Fireworks will create an HTML page with either a GIF or JPG image attached for all exercises. More can be found in Moodle on how to do this.

The **Prof. AI Exercises** found in Moodle are my original exercises updated to the CS3 and/or CS4 version of Fireworks. These exercises are not just duplicates found in the textbook and therefore give you a few more tools to add to your knowledge tool chest.

Note: I have given you more time to complete as many of these exercises as you can do in the weeks allotted, however, they need to be turned in on or before **Nov 01** so we can begin our studies of **Flash CS4 Pro**.

I would prefer that you turn them in as soon as you do them, I will strive to grade them in a timely manner. These exercises will add to your final score in this class, so don't ignore them completely. **GRADING:** ('A'= 90%; 'B'=80%; 'C'=70% done.)
